Grupa Azoty decides to cease publishing consolidated production volumes

Grupa Azoty has decided to stop publishing estimated production volumes. This decision was made, among other reasons, due to the lack of significant deviations in production volumes of Grupa Azoty companies in the recent period compared to the corresponding period of the previous year, while gradually increasing the utilization of production capacities within the Grupa Azoty S.A. Capital Group.

Data on production volumes will now be available in periodic reports.
