Grupa Azoty Puławy halts caprolactam and melamine production

On March 9th 2023, the Management Board of Grupa Azoty Zakłady Azotowe Puławy S.A. made the decision to suspend production of caprolactam (Plastics segment) and the operation of the Melamine III unit (Agro Fertilizers segment) from March 10th 2023 due to the prevailing supply and demand situation in the European market.

Production at the other two melamine units (Melamine I and Melamine II) was halted in the summer of 2022, as previously announced by Grupa Azoty Puławy in current reports.
