## The Grupa Azoty Group successfully passes Fertilizers Europe audit for fertiliser products

The Product Stewardship Programme audit is an initiative by Fertilizers Europe, an organisation representing the largest European fertiliser producers. The audit reaffirmed that the Grupa Azoty Group's fertiliser products comply with the highest standards. DNV auditors evaluated various parameters throughout the process, such as the benchmarks implemented during product design, technological processes, distribution, and the genuine fulfilment of fertiliser characteristics declared by the Group. The audit covered the main production facilities located in Kędzierzyn-Koźle, Police, Puławy, and Tarnów.

As a member of Fertilizers Europe, the Grupa Azoty Group is required to partake in recertification audits under the Product Stewardship Programme every three years. The successful completion of such audit confirms that the auditee adheres to the highest international standards in fertiliser production, facilitating the use of advanced production techniques and safety procedures in accordance with European regulations.

"At Grupa Azoty, we continually broaden our fertiliser product portfolio while keeping climate policy regulations in mind. We are introducing products that cater to the needs of sustainable agriculture and simultaneously allow farmers to meet their production objectives. The certificate we have earned attests that our fertilisers meet the stringent standards of the fertiliser industry," comments **Filip Grzegorzczak, Vice President of the Management Board of Grupa Azoty S.A. and Vice President of Fertilizers Europe**.

*"Product Stewardship Programme developed by Fertilizers Europe sets the highest global standards in fertilizer production. This programme is fertilizer industry's commitment to the uppermost standards in terms of quality, safety, security and environment. I would like to congratulate Grupa Azoty for successfully passing the external*

audit, confirming company's commitment to the highest standards in every stage of the production process, *including product development, raw material sourcing, fertilizer manufacturing, distribution, and storage as well as marketing and sales*" said **Dr. Antoine Hoxha, Director General of Fertilizers Europe.**
